MADE WITH LITTLE STORYBOOK

The Little Raindrop's Journey

Visual lesson

Plip on the Hilltop

Plip! A shiny raindrop lands on top of a big hill. It sits there round and bright, like a drop of water on the back of your hand. But it won't stay still — watch what it does next!

Water Always Goes Down

Water loves to go down, never up. So Plip rolls downhill, because down is the only way water wants to go. Just like tipping a cup in the bath — water always runs to the lowest place!

> **TALK ABOUT IT**
> Which way does Plip roll?

Many Drops Make a Stream

Now Plip is not alone! More raindrops fall and run down the same little path, like lots of children sliding down the same slide. So many drops join up that they make a tiny trickle, then a splashy little stream.

TALK ABOUT IT
Find where the water is biggest.

The Stream Grows Into a River

What do you think happens as the water keeps going — does it shrink or grow? It grows! The water scoops out a long groove in the ground, like dragging your finger through sand, until it becomes wide and long. That big flowing water has a name: a river!

> TALK ABOUT IT
> Does the water shrink or grow?

All the Way to the Sea

Here is the wow part: every river is going somewhere — all the way to the sea! Plip travels down, down, down until it reaches the great big ocean. From one little drop on a hill to the giant sea! Next time rain slides down a window, whisper, "Go on, little raindrop, find your river!"

Check your wonder

1 **Which way does water always go?**

- **A.** Downhill
- **B.** Uphill

2 **What do many little drops make?**

- **A.** One big stream
- **B.** A dry rock
- **C.** A cloud

3 **Where does the river go in the end?**

- **A.** To the sea
- **B.** Back to the hilltop

ANSWERS 1-A 2-A 3-A

1. Yes! Water always runs downhill to the lowest place. 2. That's right! Many little drops squish together into one big stream. 3. Yes! Every river travels down, down, down all the way to the sea.

THE END
